

# DECORATIVE QUARTZ

## SEAMLESS FLOORING FOR LASTING BEAUTY AND DURABILITY

Choosing an aesthetically pleasing floor is important, but flooring must also be durable enough to endure abuse from abrasion, impact, chemicals and frequent cleaning and scrubbing. In these situations, a decorative quartz system from Tnemec offers unmatched endurance and long-lasting visual appeal.

[Series 222 Deco-Tread](#) and [Series 223 Deco-Trowel](#) flooring products combine the strength of an epoxy resin with the beauty of multicolored ceramic quartz aggregate for a seamless, impact-resistant surface that is easy to maintain. These fluid-applied coatings help create a seamless transition from the floor to wall, protecting against cleaning solutions, chemicals and bacterial invasion and leaving no unsightly grout lines, seams or joints for water to penetrate and cause damage.

With Tnemec's quartz-filled floor coatings, a variety of finishes and textures are available and each system can be tailored for any environment,

## FEATURES AND BENEFITS

- Seamless, monolithic surface
- Easily cleaned and maintained
- Superior aesthetics
- Extremely durable
- 100% solids epoxy and low odor
- Broadcast or mortar application

including pharmaceutical plants, laboratories, food and beverage processing facilities, hospital operating rooms, locker areas and school cafeterias.

For help finding the right StrataShield flooring system to fit your needs, or to schedule an evaluation of your facility, [contact](#) your local Tnemec representative at [tnemec.com](http://tnemec.com).

# AVAILABLE COLORS

Choose from a range of standard and custom quartz color blends to create a unique floor for your environment. All color blends are available for both broadcast and mortar applications. Series 223 Deco-Trowel will exhibit a different texture and appearance than Series 222 Deco-Tread shown below.

A seamless transition from the floor to the wall can be created by integrating either a cant or rolled radius cove into the existing wall, unlike rubber base materials.
